

Reusable Anesthesia Breathing Masks

Reusable Anesthesia Breathing Masks from GE Healthcare are tested and verified to function with GE Healthcare anesthesia machines. Anesthesia breathing masks are designed to channel gas mixtures to the patient for non-invasive ventilation via the mouth and nose. The products perform optimally with GE Healthcare anesthesia machine breathing systems when applicable.

FEATURES

- Clear face piece allows visual observation of patient status
- Compatible with all standard breathing systems with 22mm and 15mm connectors where applicable
- Available in sizes from neonatal through large adults
- Reusable masks are autoclavable up to 50 times

REUSABLE ANESTHESIA MASK OFFERINGS

Silicone reusable anesthesia masks are designed to channel anesthesia gases or fresh gas mixtures to the patient for inhalation via the mouth and nose. Anesthesia masks are to be used in conjunction with anesthesia and ventilator breathing systems. They are reusable and fully autoclavable up to 50 cycles. The molded texture of the rim ensures maximum patient comfort and a tight seal, while the transparent face piece allows patient monitoring at all times.

PRODUCT SPECIFICATIONS

Material composition

Component	Material
Mask	Silicone
Connector	Silicone
Silicone Reusable Face Masks	Do not contain natural rubber latex.
Silicone Reusable Face Masks	Do not contain natural phthalate DEHP.

Product use

Silicone Reusable Anesthesia Face Masks are reusable devices. They can be reused up to 50 times.
